Silvent 007-L

Laval nozzle

SILVENT 007 with a Laval nozzle is the most commonly chosen alternative. A stainless steel Laval nozzle mounted onto the 007 grip handles nearly any blowing application. A Laval orifice in the center of the nozzle creates a highly concentrated air stream. Around the Laval hole there are a number of diverging slots that generate a powerful, quiet and laminar airflow. The combination provides superior cleaning performance and optimal utilization of the compressed air. Fins prevent direct contact between skin and the outlet holes. Fully complies with OSHA safety regulations and EU Machine Directive noise limitations. Patented.

Technical data

Item number	720227
Air consumption	22 Nm³/h
Sound	82 dB(A)
Blowing Power	3.5 N
Material	Stainless Steel
Air pattern	Laval
